SUMMARY

As a Golang developer, I have a deep understanding of the Go programming language and experience building scalable and robust systems using Go. I have worked with technologies such as microservices, REST APIs, and cloud computing platforms, and have a strong understanding of programming concepts such as concurrency, memory management, and testing. I have experience working in Agile development environments and am used to collaborating with cross-functional teams to deliver timely and high-quality code. In addition, I have proficient knowledge of other related technologies such as Git, Docker, and Kubernetes.

EXPERIENCE

Full Stack Developer

Upwork

📅 09/2016 - 06/2019   📍 Munich, Germany

As a full stack developer on Upwork, I have had the opportunity to work on a diverse range of projects for clients from around the world. My experience includes designing and developing websites and web applications from the ground up, as well as debugging and enhancing existing code.
- Worked well independently and on a team to solve problems.
- Converted a Figma design into HTML pages using React, HTML, CSS while closely working with designers.
- Supported the DevOps team to automate CI/CD processes.

- Managed 100+ client accounts and received 95% satisfaction

Golang developer

TestDome

📅 07/2019 - 03/2023   📍 San Francisco, Mexico

As a Golang developer at TestDome, I implemented various caching mechanisms and optimized database queries to improve response times and reduce server load. I also worked on implementing new features, such as real-time notifications and advanced search functionality, that helped to improve the user experience and increase engagement.
- Which of your achievements match the job you're applying to?

EDUCATION

Bachelor's Degree

Technical University of Munich

📅 04/2013 - 06/2015
